
Fragmenta

Fragmenta

Piccoli gesti provenienti dal passato, materiali plasmati dalla natura che diventano scaglie di memoria. Vedere le cose da un diverso punto di vista può cambiarne dimensione, aspetto, colore e forma: un frammento è una vita o una manciata di secondi, è un sasso o un intero continente. Parti di storia e di sapere, tradizione ed innovazione, tecnologia ed arte racchiusi in Fragmenta.

Small gestures from the past, material created by nature which becomes a part of our memory. Seeing things from a different point of view can change its dimension, aspect, colour and shape: a piece can be a lifetime or just a few seconds, it's a stone or an entire continent. Parts of history and of knowledge tradition and innovation technology and art all inside Fragmenta.
